FOOD-GRADE NITROGEN

PATENTED SYSTEM

NITROSWING

Nitrogen generator with evolutionary capacity.

NITROSWING® is a nitrogen generator delivering on-site **food-grade nitrogen, certified by an external laboratory**. Nitrogen for brewery is a perfect substitute of CO2, providing effective inerting of bottles and tanks and ensuring an optimum beer quality (smoother texture, fine bubbles).

NITROSWING® offers the highest standards in terms of **efficiency, flexibility and reliability**. Thanks to its patented modular system, it produces flexible nitrogen flow by simply adding PSA modules. This way, **your generator follows the evolution of your production capacities**.
